

UBQ

The UBQ washing head is a high-pressure cleaning device for small and medium-sized car parts, bins, and cans. Technologically advanced and sophisticated but at the same time robust, the UBQ washing head is reliable in various applications that require high-pressure washing of persistent residues.

An hydraulic engine keeps the rotating part of the spray ball in motion. Thanks to its design, the device does not require oils or greases for lubrication.

The main innovation of the UBQ head lies in its rotating head. Depending on the application and cleaning needs, the position of the nozzles can vary in different configurations for a total of 6 different angles. 12 enclosures can accommodate a minimum of 2 up to a maximum of 4 F nozzles simultaneously. The flat jet nozzles F are designed explicitly for high-pressure washing. Their internal geometry ensures uniform jet distribution and highly effective cleaning action.

The head is available in the *axial configuration* – with an integrated filter – or *tangential*. Made of AISI 303 stainless steel, the UBQ washing head has a flow rate ranging from 15 to 30 liters per minute to a maximum of 150 bar.

MATERIALS: AISI 303 S.S.

CONNECTIONS: 1/8" BSPP

WATER INLET AXIAL VERSION: 1/2" G

WATER INLET TANGENTIAL VERSION: 3/8" G

Axial configuration

CODE	Liters per minute [lpm]	Inlet nozzle dimensions [mm]	Water inlet configuration and dimension	Number of nozzles
